Please call to register 252-794-5317		

IF YOU MISSED THE MANDATORY AUXIN TRAINING

For those that missed the Mandatory Auxin Training you will have another opportunity coming up soon. Once the NC Department of Agriculture gives me approval to schedule the 1 hour training we will get the date out. This will be the **ONLY** opportunity in Bertie County to get Auxin Credits so it will be imperative that you attend!

4-H Livestock Show and Sale

If you have youth interested in showing a goat, lamb, hog, heifer or steer in the 4-H Livestock Show and Sale please contact our Bertie County 4-H Agent Guy Holley at 252-794-5317 or gaholley@ncsu.edu

Youth that participate in the 4-H Livestock Show and Sale learn responsibility and management skills while raising their animals as well as develop leadership and sportsmanship skills. Youth also practice their business and marketing skills, as they gain support from community supporters and buyers.

Internet Connectivity Survey for NC Farmers

The survey is located here: <https://ncbroadband.gov/farmers>

The North Carolina Broadband Infrastructure Office, with the Friday Institute at NC State University, is conducting a five-minute survey* to gather data on internet connectivity from North Carolina farmers. The data will be used to inform research, policy and funding recommendations to assist communities where internet access is inadequate.

This survey includes an optional internet speed test. If your farm office currently has internet service, please take this survey from that location.

Your farm office address is critical to identifying underserved farms. We ask that you provide the street address of the farm office to help us identify areas needing improved internet access. Farm office locations may be:

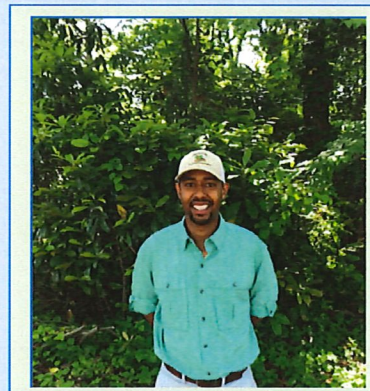

- mapped to show unmet needs or demand for high speed internet
- shared with relevant internet service providers or other partners to identify service solutions
- included in a public map, with location points buffered for privacy

*This survey was developed in part from information gathered during NC Farm Bureau Federation listening sessions conducted with local farmers and agriculture partners.
